# Eaglesoft Mobile takes your practice further

With Eaglesoft's Mobile feature, the world's most powerful practice management software is wherever you are.

New to the release of Eaglesoft 17, this web-based feature gives you access to your patient information from all your devices, anywhere you have Internet access.

"Eaglesoft Mobile is really the fulfillment of a promise that we make to the practices we serve," said Patterson Dental President Paul Guggenheim. "We are dedicated to helping enhance the patient experience and practice lifestyle of the practices we serve, and Eaglesoft Mobile allows us to do both."

In particular, Guggenheim said, Eaglesoft Mobile makes great strides in improving the practice lifestyle. Many of the same tasks – like editing Post Procedure Notes, viewing upcoming Appointments or, yes, changing or editing Tasks – that would've required a staff member to be onsite, can now be accessed remotely.

That's because Eaglesoft Mobile works seamlessly with your Eaglesoft Application Database to deliver you up-to-date information even when you're not onsite. Eaglesoft Mobile's real-time integration works both ways, so when you make a change to a Task or Post Procedure Note in Eaglesoft Mobile, it's also updated in the application database you access through your office computers. "We are beyond excited to start rolling out Eaglesoft Mobile to our customers," said Patterson Technology Marketing Manager Jana Berghoff, RDH, FAADOM. "It's another way we are optimizing the Eaglesoft experience, and it's thanks in part to Eaglesoft users telling us where they want the software to go."

Eaglesoft Mobile's intuitive user interface includes relevant, up-to-the-minute news with the same RSS feed you find in the full software. Its left-aligned navigation panel highlights the areas of your Eaglesoft database that you can access at any time, from any screen.

Here's some of what you will find in Eaglesoft Mobile:

✓ **Accounts**

The Accounts feature allows you to access a wide array of patient information. This includes financial data, including account balance and service history, for any patient. Just search by last name, and then select the account you want to review.

✓ **Appointments**

View your schedule by day, week or month – or view a specific date by entering it in the date field, all within the Appointments feature. Eaglesoft Mobile's convenient dropdown menus even allow you to filter your schedule by chair and provider. Then, go deeper by clicking any appointment to view specific details of that appointment.

✓ **Patients**

While the Accounts feature shows you information about a patient's account history, the Patients feature provides information in the patient file. View everything from patient demographic information to any images taken on that patient using a variety of simple tabs located within the patient card. You can easily find services that have already been performed, those that are planned, or notes on any appointments, insurance coverage, and family members who are also patients.

✓ **PostOp**

In the past, you may have had to print the post-op calls report before leaving the office. Eaglesoft Mobile fixes that problem. By selecting the PostOp feature, you can view scheduled post-op calls by date and provider. Just pull it up directly from your device and check on your patient!

✓ **Post Procedure Notes**

Once the appointment is over, you can view any notes you made post-procedure by accessing the Post Procedure Notes feature. That's not all, though. From here you can also edit the note directly from Eaglesoft Mobile. Any changes will appear real-time in your Eaglesoft Application Database!

✓ **Tasks**

You can always view and edit your tasks in Eaglesoft Mobile!
Any changes or additions made to tasks will also appear real-time.

✓ **Communication**

Communication has never been easier. The Phone Book feature allows you to easily find phone numbers, and if you're using a mobile device with the free Skype app, you can select a phone number hyperlink and go directly to a Skype session! Or, quickly select the email hyperlink to send them an email without leaving the page.

Eaglesoft Mobile is designed to give dental practices and team members more freedom. With the ability to view and do so much more, dentists nationwide are discovering how Eaglesoft Mobile can help them care for their patients – even when they are away from the office.
